

## **Medical Director / Senior Medical Director, Clinical Development**

Karius is a venture-backed life science startup that is transforming the way pathogens and other microbes are observed throughout the body. By unlocking the information present in microbial cell-free DNA, we're helping doctors quickly solve their most challenging cases, providing industry partners with access to 1000's of biomarkers to accelerate clinical trials, discovering new microbes, and reducing patient suffering worldwide.

### **Position Summary:**

We are looking for an outstanding Clinician to lead in the design and execution of our pivotal clinical trials. You will provide strategic leadership in developing the evidence necessary to achieve adoption, reimbursement and regulatory approval. You will also provide medical and scientific support to sites throughout study execution and support our publication strategy efforts.

You will provide medical leadership in cross-functional teams that include the commercial, clinical, operations, and product teams as we build future products to solve some of the toughest problems in infectious diseases.

Reports to: CSO

Location: Redwood City, CA

### **Responsibilities Include:**

- Plan, design, and publish pivotal clinical validation, clinical utility, and health economic studies to facilitate adoption of the Karius Test in the infectious disease market
- Architect clinical development strategy with executive team
- Provide clinical guidance into future product development and enhancements
- Provide medical and/or scientific expertise and leadership to project team during lifecycle of study
- Generate reports and data to aid in regulatory submissions as well as generate and/or review publications, posters, and scientific presentations
- Provide medical leadership in all grant requests for support of Investigator Initiated Studies

### **Travel:**

- 10% - 20%

### **Physical Requirements:**

- Subject to extended periods of sitting and/or standing, vision to monitor and moderate noise levels.

### **Position Requirements:**

- Doctoral-level degree in the Life Sciences (MD or DO).
- Minimum 5 years professional experience in a clinical setting and/or industry related to infectious disease.
- Successful design, execution, and publication of at least one multi-center prospective clinical utility or health economics focused study in infectious disease.
- Expertise in scientific and clinical data review and interpretation.
- Outstanding communication skills including public speaking, written communication.
- Demonstrated ability to thrive in cross-functional environment focused on company-level goals.
- Track-record of producing outstanding publications, clinical study reports, and poster presentations.
- Project leadership and management skills.

At Karius, we value a diverse and inclusive workplace and provide equal employment opportunity for all applicants and employees and are committed to honor and invest in the full diversity of people, in our hiring, recruiting and development of employees across the Company. All qualified applicants for employment are encouraged to apply and will be considered without regard to an individual's race, color, sex, gender identity and gender expression (including transgender individuals who are transitioning, have transitioned, or are perceived to be transitioning to the gender with which they identify), religion, age, national origin or ancestry, citizenship, physical or mental disability, medical condition, family care status, marital status, domestic partner status, sexual orientation, genetic information, military or veteran status, or any other basis protected by federal, state or local laws. If you are unable to submit your application due to a disability, please contact us at [recruiting@kariusdx.com](mailto:recruiting@kariusdx.com) and we will accommodate qualified individuals with disabilities.
