

## INFECTIOUS DISEASES POSITION: Research Focus-Young Investigator

The Section of Pediatric Infectious Diseases at the Medical College of Wisconsin is recruiting a qualified individual at the Assistant Professor level to join its current eight-member group. Candidates should have completed an approved fellowship training program in Pediatric Infectious Diseases and be Board Certified or eligible in both general pediatrics and pediatric infectious diseases.

The Section is seeking an individual with research-focused academic interests. Young highly motivated, or already established investigators are encouraged to apply. The Division of Infectious Diseases, and the Department of Pediatrics, share a strong commitment to the support of young faculty who are working to develop a career in research.

Current areas of active investigation and clinical strengths within the section include CMV biology and treatment, Antimicrobial Stewardship, HIV epidemiology and therapy, molecular virology, molecular techniques for rapid diagnosis of infectious agents, fungal immunology, and pathophysiology of CNS infections. Collaboration with a variety of clinicians and investigators within the Department of Pediatrics and basic science departments of the Medical School is encouraged.

The Department of Pediatrics at the Medical College of Wisconsin has more than 300 full-time faculty. Its offices and laboratories are contiguous with the Medical College of Wisconsin, a large, free-standing private medical school, and the Children's Hospital of Wisconsin, a 306-bed children's hospital.
