

## HIV Fellowship

University of Tennessee Health Sciences Center/St.  
Jude Children's Research Hospital

The Department of Pediatric Infectious Diseases at St. Jude Children's Research Hospital has an opening for a fellow in HIV medicine beginning August 10, 2021. Interested candidates may contact:

**Trachia Wilson** | Fellowship Program Coordinator  
Pediatric Infectious Diseases | St. Jude Children's Research Hospital  
Email: [trachia.wilson@stjude.org](mailto:trachia.wilson@stjude.org)

**Elisabeth Adderson, MD, MSc** | Fellowship Program Director  
Pediatric Infectious Diseases | St. Jude Children's Research Hospital  
Email: [elisabeth.adderson@stjude.org](mailto:elisabeth.adderson@stjude.org)

This 6-12 month program offers an exceptional opportunity for training in HIV medicine for pediatric, pediatric infectious diseases, and internal medicine-pediatrics practitioners. The [HIV Clinical Program](#) at St. Jude has been recognized as a Center of Excellence by the Robert Wood Johnson Foundation and is an International Maternal Pediatric Adolescent AIDS Clinical Trials (IMPAACT), Adolescent Trials Network (ATN), and Pediatric HIV/AIDS Cohort Study (PHACS) study site. In addition to robust clinical programs targeting traditional pediatric infectious diseases, we are national leaders in the care of immunocompromised patients and in providing education related to this population.

We practice in 2 beautiful, new freestanding children's hospitals that offer the latest technology and put patient care at the forefront. Training is individualized and may include electives in antimicrobial stewardship, infection prevention, global health, and others. We provide didactic and pragmatic education in the principles and practice of scientific investigation, cutting edge research tools, and unparalleled resources. Fellows have the opportunity to learn through formal programs leading to master's and doctoral degrees in epidemiology, public health, biomedical sciences, global child health and other disciplines, and to contribute to research projects that cross departments and institutions, including in clinical, translational, and basic sciences.

Fellows receive a professional development allowance, research allowance, a personal computer for use during the fellowship, tuition assistance, dependent care assistance, moving allowance, an employer-contributed retirement savings plan, an onsite health and fitness facility, flexible health and dependent care savings accounts, medical, dental and vision insurance (cost shared), and disability, long term disability, and group life insurance. Memphis offers a relaxed, affordable lifestyle with excellent cultural and recreational amenities.
