

The University of Rochester's Department of Pediatrics, Division of Infectious Diseases is seeking to add a board certified/eligible physician to lead the rapidly growing Antimicrobial Stewardship program at Golisano Children's Hospital in Rochester, NY. Successful applicants will be expected to coordinate with other pediatric divisions to develop antibiotic use guidelines and contribute to scholarly activity in the field of antimicrobial stewardship while sharing in the clinical and educational activities of the Pediatric Infectious Diseases division.

The Division of Infectious Diseases resides within the highly collaborative and academically diverse Department of Pediatrics. Notable past achievements include Development of the *H. influenzae* vaccine; surfactant replacement therapy for premature infants and development of the Rochester criteria which provides a safe way to manage the febrile infant without hospitalization.

The Division provides inpatient and outpatient care within [Golisano Children's Hospital](#), one of the premier children's hospitals in Upstate New York, featuring a newly built 8 story children's hospital with a 68-bed NICU, and a 28-bed PICU that includes a dedicated cardiac care unit. The Division enjoys a close working relationship with the Infectious Diseases Division in the Department of Internal Medicine.

Rochester was recently voted one of the 10 most livable cities in the U.S., enjoys multiple nationally-ranked public high schools, and boasts a rich arts, sports, and collegial atmosphere, both within and outside of the University. It is located in the spectacular Finger Lakes region of NY, with year-round outdoor activities and a burgeoning wine industry, which greatly enhance the quality of life for Rochester residents. Interested candidates should submit their current curriculum vitae, along with a letter of interest to Jennifer_Nayak@urmc.rochester.edu or Laurie_Passalacqua@urmc.rochester.edu
