

East Tennessee Children's Hospital, a free-standing, independent, not-for-profit tertiary care medical center in Knoxville, Tennessee, is looking for a second Pediatric Infectious Disease specialist. We are a regional pediatric referral center, with 153 beds and more than 100 subspecialists serving children and their families from Tennessee, Kentucky, and Virginia. Our busy ED, PICU, NICU, inpatient service, and clinics have 150,000+ visits annually.

The Pediatric Infectious Disease Service is an established clinical practice that provides inpatient and outpatient consultations and follow up, and is heavily involved with Infection Prevention, Antibiotic Stewardship, Hospital Epidemiology, and various quality programs in the hospital. We also provide pediatric ID coverage at the nearby University of Tennessee Medical Center and have teaching opportunities for rotating students and trainees at Children's Hospital. We maintain a close, collaborative relationship with the local and state public health authorities. Clinical research is an option but not required. The successful candidate will be board eligible/certified in Pediatric Infectious Disease, with enthusiasm, strong clinical and interpersonal skills, and a desire to continue our tradition of high-quality care.

Knoxville is a great place to live! Home to the flagship campus of the University of Tennessee and near the Oak Ridge National Laboratory, our mid-sized city offers a wealth of cultural and intellectual opportunities, and a vibrant arts scene. Our close proximity to Great Smoky Mountain National Park brings many out-of-state visitors to our doors, and allows rapid access to a unique protected wilderness, while the area's lakes and other parks provide many other recreational options. A good range of schools and extracurricular activities make this a wonderful place to raise a family.
