

**UPMC Children's Hospital of Pittsburgh
Department of Pediatrics, Division of Infectious Diseases
University of Pittsburgh School of Medicine**

The Division of Infectious Diseases at the UPMC Children's Hospital of Pittsburgh (CHP) and the Department of Pediatrics, University of Pittsburgh is recruiting a full-time faculty member (MD, DO, MD/PhD or equivalent) at Assistant or Associate Professor rank (new fellowship graduates welcome to apply) with interest and/or experience in infectious diseases among transplant and immune compromised patients. The role will include sharing responsibilities with other TID physicians to support the solid organ and stem cell transplant services. The division will divide the clinical inpatient service into a General ID and Immunocompromised Host ID service.

Duties will include ~60% clinical effort (~22 weeks) providing consultative infectious disease inpatient patient care and some outpatient clinics, including pre-transplant evaluations. Other duties include development of clinical guidelines and participation in transplant clinical conferences. The role will include time for academic work, but there is no requirement to obtain extramural funding. Opportunities abound for clinical research, clinical trials, systematic local and/or national quality improvement projects, and other scholarly activity. The faculty member will have the opportunity to participate in fellow, resident, and medical student education.

CHP is a 315-bed state-of-the-art hospital that opened in 2009 serving a >2.6 million population catchment area in Western Pennsylvania. CHP was ranked 9th in the nation overall in the 2020-2021 U.S. News & World Report Honor Roll of America's "Best Children's Hospitals." CHP performs liver, intestine, multivisceral, heart, lung, kidney, and HSCT. In 2018, CHP performed 31 liver, 13 heart, 14 kidney, and 42 HSCT transplants. The University of Pittsburgh holds >\$500 million of NIH funding and ranks fourth among more than 3,000 entities that receive NIH support. Pitt offers an extremely collegial environment, with expertise in microbial pathogenesis, immunology, structural biology, and many other disciplines.

Pittsburgh is a vibrant city with art and music treasures, easy access to the great outdoors, and charming neighborhoods, and an excellent cost of living. Pittsburgh is home to the exciting Pittsburgh Steelers, Pirates, and Penguins, and the world-renowned Pittsburgh Symphony Orchestra. Learn more at www.coolpgh.pitt.edu.
