

### **Physician Scientist (Associate Professor or Professor)**

The *Division of Pediatric Infectious Diseases* and the *Center for Childhood Infections and Vaccines (CCIV)*, a joint entity within Children's Healthcare of Atlanta and Emory University School of Medicine, invites applications for a tenure eligible physician scientist (MD or MD/PhD) position at the Associate or Professor level, with a research focus on microbial ecology and antimicrobial resistance.

Faculty appointment will be in the Department of Pediatrics within the Emory University School of Medicine. We offer a highly interactive collegial research environment with state-of-the-art facilities, as well as proximity to and collaborations with the Department of Medicine Division of Infectious Disease, Emory Vaccine Center, Emory University Rollins School of Public Health, the Georgia Institute of Technology, and the Centers for Disease Control and Prevention. Visit our [website](#) for more information on our faculty, department, and resources.

Areas of particular interest relate to the microbial ecology and clinical and molecular epidemiology of pediatric infections due to multi-drug resistant bacteria. We seek candidates with an established track record of obtaining extramural funding and a strong track record of research success. Ideal candidates will be collaborative scientists who bring new perspectives to the Department and Center, with a translational mindset. The successful candidate will be expected to establish and maintain an extramurally funded research program, and to participate in our strong graduate and medical student training programs through mentorship and teaching. The candidate will also be required to be American Board of Pediatrics board eligible/certified in pediatric infectious diseases and will be required to hold and maintain clinical privileges in the healthcare systems where division faculty provide clinical care. The primary criteria for selection will be excellence and creativity in research and scholarship. The candidate will be expected to develop an innovative, externally funded research program, as well as engage in cross-disciplinary initiatives.
