Children's Mercy Kansas City (CMKC), located in Kansas City, MO, has an opening in our ACGME accredited Pediatric Infectious Diseases Fellowship Program starting in July 2022.

Clinical training includes time on our general infectious diseases and immunocompromised infectious diseases consult services. Outpatient clinical training includes infectious diseases clinic with additional training in travel, HIV, international adoption, and antibiotic allergy delabeling clinics. Fellows also have dedicated time with the microbiology lab, antibiotic stewardship program (one of the oldest pediatric programs), and infection prevention team. Fellows also receive quality improvement, grant writing, and biostatistics training as well as tuition support for masters and certificate programs if desired. Global health opportunities are also available. Fellows have a variety of research opportunities including basic science, translational, clinical, outcomes, and quality improvement with mentorship from divisional and extra-divisional faculty.

Children's Mercy Kansas City is a free-standing children's hospital with 386 beds. A top-ranked hospital with 40 pediatric specialties, CMKC serves as the regional referral center and provides excellent training in clinical pediatrics. Strong support from the Children's Mercy Research Institute provides training for the next generation of physician scientists.

Kansas City is a vibrant city of 2.5 million people located on the state line of Kansas and Missouri. It has a rich arts and culture community, beautiful parks, fantastic architecture, and more than 200 fountains. With its world-class museums, lively arts scene, winning sports teams, and friendly people, the city continues to grow and expand.
