

Rochester General Hospital Research Institute (RGHRI) Center for Infectious Diseases and Immunology, Rochester NY seeks applicants at the Assistant, Associate and Full Professor academic rank (or equivalent) to join a group of 9 physicians and scientists focused on impactful research in vaccine immunobiology, development of novel vaccines and conducting vaccine clinical trials, respiratory infection pathogenesis and epidemiology, and immune host response of young children. Applicants who share those interests will become part of a highly productive, well-funded, multi-disciplinary team with ongoing collaborations with Harvard/Boston Children's Hospital, Harvard/Brigham and Women's Hospital Channing Laboratory, University of British Columbia (Vancouver), University of Perth (Australia), Drexel University, University of Rochester, and Rochester Institute of Technology. RGHRI has similar metrics of success for promotion as an academic medical center in a friendly, kind and supportive work environment. The Director mentors members of the group to a clear path of success and transition to leadership in academia, public health and industry. RGHRI offers better pay and benefits than most academic institutions.

Rochester General Hospital has a small pediatric inpatient service and level II NICU. Most pediatric care occurs across town at the University of Rochester Medical Center. Members of the RGHRI Center for Infectious Diseases and Immunology do not have inpatient rounding responsibility in the hospital and minimal administrative duties. Clinical and teaching activity occurs at local pediatric practice sites where multiple clinical trials (supported by NIH, CDC and Industry) are ongoing. The RGHRI Center for Infectious Diseases and Immunology occupies two floors of a Research building that is connected to the Rochester General Hospital.

RGHRI is part of Rochester Regional Health, a not-for-profit, integrated health services organization serving patients of Western NY and the Finger Lakes through 9 hospitals and 147 primary care and ambulatory locations, including 12 pediatric practices.

Rochester NY is a wonderful place to live and raise a family. It was recently voted one of the 10 most livable cities in the U.S. Interested candidates should submit their current curriculum vitae, along with a letter of interest to the Director: Michael.Pichichero@rochesterregional.org.
