RESEARCH POSTERS

Moderator: Buddy Creech, MD – Vanderbilt University Medical Center

Andrew B. Janowski, MD – Washington University School of Medicine
The highly conserved stem-loop II RNA element (s2m) is critical for the lifecycle of astrovirus VA1 but is dispensable for SARS-CoV-2

David Berman, DO – Karius Diagnostics
Rapid, Non-Invasive Detection of Non-H. pylori Helicobacter Infections in Immunocompromised Children Using Microbial Cell-Free DNA Next Generation Sequencing in Plasma

Jane Symington, MD, PhD – University of California San Francisco
Elucidating key interactions between macrophages and Coccidioides

Maria Perez – Emory University
An RSV live-attenuated vaccine candidate lacking G protein mucin domains is highly attenuated, immunogenic, and effective in RSV prevention in BALB/c mice

Stephen Isabell – University of Minnesota Medical School
Does Cytomegalovirus (CMV) Status Impact the Host Response to SARS-CoV-2?

Shelby Walcott – University of Alabama at Birmingham
Resolution of thrombocytopenia during treatment for symptomatic congenital cytomegalovirus disease

Rachel Bass – Northwestern University Feinberg School of Medicine
Nasal microbiota differences in young infants are associated with early childhood irritability

Friday, March 4
Pediatric Infectious Diseases Research Symposium
7:55 – 8:00 AM
Welcome and Announcements

C. Buddy Creech, MD, MPH
President, Pediatric Infectious Diseases Society
Edie Carell Johnson Chair and Professor of Pediatric Infectious Diseases
Director, Vanderbilt Vaccine Research Program
Vanderbilt University Medical Center

Elaine Tuomanen, MD
Chair, Department of Infectious Diseases
Director, Children’s Infection Defense Center
St. Jude Children’s Research Hospital
