

We are seeking a leader for the Environment of Care (EOC) group to join our Infection Prevention team at Cincinnati Children's Hospital Medical Center in Cincinnati, Ohio. The Infection Preventionist-III, EOC Lead (IP-III) will provide programmatic leadership, as well as develop, review, and update the facility's protocols and procedures for infection control and prevention as they relate to the environment of care (i.e., construction/renovation, plant engineering, environmental services, etc). The IP-III will ensure adherence through rounding, education & intervention & act as a consultant/collaborator with EOC partners and institutional stakeholders through committees and informal interaction. The IP-III will play an active role in program vision and management as a member of the Program Leadership Team, and will participate in the supervision, development, coaching, motivation and evaluation of department personnel. Consistent communication will occur through facilitation of staff meetings, leadership team meetings and individual interactions.

CAREER LEVEL SUMMARY:

- Requires specialized depth and/or breadth of expertise and knowledge of EOC activities
- Independently achieves operational, project, and service objectives
- Leads other employees, teams or projects of risk
- Manages varied and complex cases; trains others within job area

Qualifications:

Required:

- Masters degree in related field. Requires clinical license, certification or training
- 5 - 7 years of work experience in a related job discipline.

Preferred:

- Masters degree in environmental health, public health or related field
- Experience with CMS regulations for the built healthcare environment
- Certification in Infection Control (CIC)
