Children's National®

The Division of Pediatric Infectious Diseases at Children's National Hospital in Washington DC announces recruitment for a **new full time MD or MD/PhD faculty member focused on general pediatric infectious diseases** at the Assistant or Associate-Professor level. Clinical duties will include providing consultative infectious diseases inpatient and outpatient care, and telemedicine consultation. The physician will have teaching responsibilities to medical students, residents and Infectious Diseases fellows. This full time position includes a minimum of 20% time reserved for academic activities for applicants without research funding, or up to 75% protected research time for applicants with secured research funding.

The ID division currently consists of 11 faculty members, providing the full range of comprehensive inpatient and outpatient consultative services for both immunocompetent and immunocompromised patients. In addition to the general Infectious Diseases consult service (this position) our division also includes a Transplant/Immunocompromised Host ID consult service, a Special Immunology Service, focused on provision of care to our population of HIV-exposed and infected children, and an Antimicrobial Stewardship Program. The division is closely aligned with both the Clinical Microbiology and Infection Control/Epidemiology Divisions. The division is also dedicated to the training of Pediatric ID Fellows, with ACGME and ABP- accredited ID Fellowship training programs associated with the Food and Drug Administration, as well as the National Institutes of Health. CNH is a 360 bed free-standing children's hospital consistently rated in the top 10 US News and World Report pediatric institutions, which provides the full range of referral and primary care to children in the Washington DC metropolitan region, with a culturally diverse and international patient population base. CNMC provides the most modern and updated clinical facilities, including a 70-bed NICU, and over 80 intensive care beds (including PICU, Cardiac ICU and Neuro ICU), Level 1 ER/ trauma center including biohazard response facility, and specialized units for Heart and Kidney, Surgical, and Oncology and Transplantation services.

Rich opportunities, state-of-the-art research facilities, and infrastructural support are present on-site for the pursuit of a wide range of clinical, basic science, epidemiologic and outcomes research. Children's Research Institute, including a Clinical and Translational Science Institute, is integrated within CNMC, facilitating close relationships between investigators and clinicians, and research by physician-scientists. Current ID faculty have expertise/research funding focusing on molecular epidemiology and clinical/translational research focusing on immunocompromised hosts, severe and emerging viral infection, congenital infections, and novel diagnostics and therapeutic agents.

The successful candidate will be board certified/eligible in Pediatric Infectious Diseases, having completed formal Infectious Diseases training at an accredited program following general Pediatrics or Med/Peds residency. **Candidates who are primarily clinical, as well as those with existing or planned funded research programs will be considered for this position.**

For inquiries or to apply, please send (electronic submission preferred) CV, cover letter contact information to the address below. References will be requested of finalist candidates.

Sincerely,

Roberta L. DeBiasi, MD, MS
Chief, Division of Pediatric Infectious Diseases
