

December 15, 2022

The Ryan White Center for Pediatric Infectious Diseases and Global Health at Indiana University School of Medicine has an open fellowship position available for July 2023.

The IUSM Pediatric Infectious Diseases and Global Health Fellowship is a three-year program for physicians interested in a career in academic pediatric infectious diseases. The fellowship offers outstanding clinical training at Riley Hospital for Children, one of the nation's top-ranked children's hospitals, with exposure to a wide variety of clinical infectious diseases and exceptional research opportunities. With 27 faculty members in our division including physicians, pharmacists, physician assistants and PhD researchers, we are one of the nation's leading research programs in pediatric infectious diseases. Our goal is to improve the health of children in Indiana and around the world through outstanding training in pediatric disease research and clinical care. Our fellowship program consists of 52 weeks of clinical training, divided between a primary ID and Immunocompromised ID service and two years of research. Fellows learn from over 4,000 inpatient and outpatient clinical encounters of complex infectious diseases each year supervised by 12 dedicated and

enthusiastic pediatric ID physicians. The educational curriculum covers diverse infectious diseases topics including microbiology, infection prevention and antimicrobial stewardship, epidemiology, global health and clinical pharmacology. Additional educational opportunities funded by our program include a Master of Science in Clinical Research through the IU CTSI and the Clinical Tropical Medicine and Travelers Health Certificate program offered by ASTMH. Fellows have a vast range of research

opportunities with nationally recognized faculty mentors in MRSA, Kawasaki Disease, antimicrobial stewardship, malaria, HIV, and global health, among others, and several of our faculty work with AMPATH, a collaboration between IU and Moi University in Eldoret, Kenya. Mentorship is also available through in the broader academic community in the Herman B Wells Center for Pediatric Research and the Departments of Medicine, Microbiology and Immunology at IU School of Medicine.

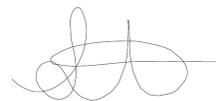

If interested, please contact our program coordinator, Kris Powell at kmpowel@iu.edu or (317) 274-3888.

Sincerely,

Alka Khaitan, MD

*Associate Professor of Clinical Pediatrics
Fellowship Program Director*

Shaina Hecht, MD, FAAP

*Assistant Assistant Professor of Clinical Pediatrics
Associate Fellowship Program Director*
