

Job Post – Nemours Children’s Hospital, Director of Antimicrobial Stewardship

Company: Nemours Children's Hospital Delaware

Salary range: 175,000-200,000

Job Title: Director of Antimicrobial Stewardship

Organization Type: Non-Profit Organization

Job posting expiration date: 10/01/2023

Brief description of the position: As Medical Director of the Antimicrobial Stewardship Program, the physician is supported by the Quality and Safety Department (0.5 FTE) and will work closely with the antimicrobial stewardship pharmacist to direct the activities of the program at Nemours Children’s Hospital, Delaware. They will be responsible to provide oversight for the development, performance, and effectiveness of the program. The Medical Director will oversee a variety of activities including stewardship rounds with clinical services and unit leadership, development and implementation of clinical pathways and laboratory stewardship initiatives and program educational activities. They will also serve as a member of the Pharmacy and Therapeutics and Infection Prevention and Control Committees.

In addition, this position includes serving as an integral member of the Division of Pediatric Infectious Diseases, joining three physicians, a specialty nurse, and an administrative assistant. The clinical inpatient consultation service supports the Blood and Bone Marrow Transplant program, the Solid Organ Transplant program, the Nemours Cardiac Center, General Pediatrics, multiple surgical services, and pediatric and neonatal ICUs. In the outpatient setting, our physicians see patients in the ambulatory care clinic as well as a multidisciplinary HIV clinic. The division also works closely with the Infection Prevention and Control team and Microbiology Laboratory. As an infectious disease attending and teaching faculty for Thomas Jefferson University-Sidney Kimmel Medical College, they will teach and supervise medical trainees at different levels including pediatric fellows, residents, and medical school students.

There are many opportunities for clinical research which is encouraged and supported by the Department of Pediatrics and Nemours.

Nemours (www.nemours.org) is an open and welcoming place to work, and values diversity in all its forms. Additionally, Nemours aspires to have its workforce and providers reflect the rich diversity of the communities we serve. Candidates of diverse backgrounds, bilingual and multi-lingual applicants, and those committed to working with diverse populations and conversant in multicultural values, are strongly encouraged to apply. Associates are encouraged to join Associate Resource Groups as members or allies to support colleagues of diverse identities and lived experiences. The Nemours Anti-Racism Statement is available at www.nemours.org
