

## **Fellowship Post – Public Health Fellowship, Helen DeVos Children’s Hospital of Corewell Health**

Company: Helen DeVos Children's Hospital of Corewell Health

Salary range: \$67,468 plus benefits

Job Title: Research Fellow

Organization Type: Non-Profit Organization

Job posting expiration date: 06/30/2024

Brief description of the position: These guidelines pertain to the Fellowship to be awarded for the 2023—2024 academic year. Corewell Health West Office of Research and Education offers a one-year Public Health Training Fellowship with mentorship from an infectious disease provider, microbiology and advanced technology laboratory technical directors and advisor of data science. The fellowship is supported by Corewell Health West and funding from the MDHHS MI-SAPPHIRE program award. The fellowship will provide a salary of \$67,468, plus benefits, for the fellowship term of July 1, 2023—June 30, 2024. All materials/supplies to support the identified training will be provided by the mentor/program.

Qualifications you are seeking: Applicant Eligibility Criteria

Applicant must be interested in an academic career in public health, clinical research and have completed an MD, PhD, DO or MBBS degree.

Applicant must be in good standing in their position/location/program, and not be on any type of corrective action status (including learning plan, remediation, probation, suspension).

Residents and fellows may, with their program director’s prior approval, interrupt their training to complete this one-year research fellowship.

Applicants on a J-1 Visa currently participating in a Spectrum Health/Michigan State University residency or fellowship program must show documentation that the proposed area of study is a designated ACGME program or qualifies as “non-standard” training as designated by the Educational Commission for Foreign Medical Grads (ECFMG). All final J-1 applicants must be approved by ECFMG prior to final employment contract/approval.

A resident/fellow in a Spectrum Health/Michigan State University program in the cap-building phase (the first five training years of a newly accredited program) may not apply.

The Fellowship is not a remote position. All fellows will be required to be onsite at a Corewell Health West campus location, with hybrid flexibility supported by the research mentor. Work location will be determined by research mentor, however will include at a minimum: 35 Michigan Clinical Lab, 115 Michigan Advanced Technology Lab, Helen DeVos Children’s Hospital, and 400 Monroe Grand Rapids Research Center.

All travel, housing, transportation and applicable arrangements are at the cost of the fellow.

Corewell Health West requires all team members to receive the COVID-19 vaccinations subject to certain exclusions based on the team member's job category. Corewell Health West is committed to granting reasonable accommodation in accordance with applicable laws.

#### Project Criteria

For this fellowship, training is defined as “patient-oriented work conducted with human subjects, or translational developments specifically designed to develop treatments or enhance diagnosis of disease. These areas of focus include epidemiologic or behavioral studies, trials, studies of disease mechanisms, the development of new technologies and health services and assay development.”

Disease-related studies not directly involving humans or human tissue also are encouraged if the primary goal is the development of patient therapies, diagnostic tests, or other tools to prevent or mitigate disease.

Project/plan should represent the applicant's original work. However, the applicant is expected and encouraged to develop this plan in collaboration with their mentor. It is appropriate for the proposed project to be specifically related to the mentor's ongoing portfolio of public health projects, but not required.

All projects must include a timeline with specific outcomes in order to ensure successful project completion in 12 months (no extensions will be granted).
