

## Pediatric Transplant Infectious Diseases Fellowship

The Division of Infectious Diseases in the Department of Pediatrics at Baylor College of Medicine and Texas Children's Hospital in Houston, TX, has an opening for a non-ACGME accredited fellowship position in pediatric transplant infectious diseases (ID) beginning on July 1, 2024. Interested candidates may contact:

Cindy Gaskill, Fellowship Program Coordinator: [cgaskill@bcm.edu](mailto:cgaskill@bcm.edu)

Catherine Foster, MD, Fellowship Program Director: [catherine.foster@bcm.edu](mailto:catherine.foster@bcm.edu)

This 12 month program is intended for individuals who have completed a pediatric ID fellowship and who wish to gain additional expertise in pediatric transplant ID. Our goal is to provide fellows with the opportunity to acquire specialized clinical, educational, research, and quality improvement training in pediatric transplant ID to serve as a foundation for successful academic careers.

The fellowship consists of clinical, elective, education, and research/quality improvement time. Clinical work is on the transplant ID inpatient and outpatient services. Elective rotations are available in pediatric transplant immunology, transplant pharmacy, transplant infection prevention and control, and transplant antimicrobial/ diagnostic stewardship. Fellows have extensive opportunities for education and teaching. Fellows also have dedicated time for research and quality improvement work. The fellowship is customizable based on individual learning/ career goals.

Texas Children's Hospital has the largest pediatric transplant center in the country, performing over 100 solid organ transplants (heart, kidney, liver, and lung) and greater than 120 hematopoietic stem cell transplants per year. Texas Children's Hospital is an 813-bed, state-of-the-art children's hospital in the heart of the Texas Medical Center, which provides an exciting, diverse and stimulating learning environment for fellows.
