

Job Post – Pediatric Infectious Disease Physician, Children’s Minnesota

Company: Children's Minnesota

Salary range:

Job Title: Pediatric Infectious Disease Physician

Organization Type: Non-Profit Organization

Job posting expiration date: 2024-06-16

Brief description of the position: The Infectious Disease Program at Children’s Minnesota is seeking a Pediatric Infectious Disease physician to join their experienced group.

The Pediatric Infectious Disease program includes 9 dedicated physicians and 1 dynamic nurse practitioner and boasts a strong collaborative approach where clinical practice, decision making, and sub-sub-specialty interests are encouraged. The ID program cares for children with acute and chronic infectious disorders in the greater area of Minnesota and western Wisconsin, as well as referrals from eastern North Dakota and northern Iowa.

The Pediatric Infectious Disease group practices at the two hospital-based sites of Children’s in Minneapolis and St. Paul, which include large neonatal and pediatric ICUs, and a large and growing Cardiovascular ICU, with a heart transplant program. Additionally, Children’s is home to Minnesota’s primary perinatal and pediatric HIV care program.

Responsible for inpatient and outpatient infectious disease consultation, and ongoing care for patients with a broad variety of acute and chronic infectious conditions. Work collaboratively with talented hospitalist medicine and emergency medicine providers along with a full complement of pediatric medical and surgical specialists. Additional partners include a robust Immunology program, which includes 2 physicians and 1 nurse practitioner.

The Pediatric Infectious Disease group serves as principal participants in the Antimicrobial Stewardship program, which includes a dedicated pediatric Infectious Disease PharmD and a multidisciplinary working committee. Through collaborative efforts with the Infection Prevention team, the ID group is actively engaged in quality improvement projects including clinical guideline development.

The Children’s Hematology and Oncology program is expanding to CAR-T therapy in the coming years, and particular expertise and interest in the infectious disease interface with these patients is desired.

Children’s serves a diverse patient population and is committed to continuous improvements in equity and diversity, including high level leadership and institutional support. The diverse population includes a number of large immigrant populations, which also provides a rich environment for practice involving global health and travel medicine.

Qualifications you are seeking:

- MD/DO with a current Minnesota Medical License or the ability to obtain one
- Board certification/eligible in Pediatric Infectious Disease
