

Job Post – Pediatric Infectious Diseases Faculty: FACES Medical Director HIV and Primary Care, Nationwide Children’s Hospital

Company: Nationwide Children's Hospital

Salary range: commensurate with experience

Job Title: Pediatric Infectious Diseases Faculty: FACES Medical Director HIV & Primary Care

Organization Type: Non-Profit Organization

Job posting expiration date: 2025-08-27

Brief description of the position: Nationwide Children’s Hospital and the Department of Pediatrics at The Ohio State University College of Medicine are seeking an Infectious Diseases physician to serve as the Medical Director of the Family AIDS Clinic and Educational Services (FACES) Program.

The FACES Program is a family-centered wrap around clinic that sees patients of all ages. Critical to the role will be experience working with adults with substance use disorder and mental health concerns. The Program team participates in national quality improvement committees, has written performance measures for HRSA, and has won several awards for their clinical quality improvement program. The Medical Director is expected to take an active role on clinical committees to fulfill grant requirements and establish best practices.

In addition to engaging in the clinical and academic activities of the Division of Infectious Diseases, the Medical Director will work alongside the operational leaders and support research, outreach within FACES, and training within quality improvement.

Qualified candidates for this position must be board certified or board eligible in IM and/or Pediatrics. The ideal candidate will be an infectious diseases trained individual who has experience in the treatment and management of adult and children living with HIV. This will include the management of infants born to mothers with HIV and Hepatitis C infections. Additionally, experience with HIV clinical research along with grant funded research is desirable.

The Section of Infectious Diseases consists of 20 clinical faculty who work closely with the Clinical Microbiology Laboratory Director and two Assistant Directors (all PhDs) and 17 research faculty with established laboratory research programs in the Centers for Microbial Pathogenesis, Vaccines and Immunity, and Child Health Equity and Outcomes Research at the Abigail Wexner Research Institute.

Named to the Top 10 Honor Roll on U.S. News & World Report’s 2022-23 list of “Best Children’s Hospitals,” Nationwide Children’s Hospital is America’s second largest children’s hospital with 527 beds. It has a Level 3 NICU, a Level 1 PICU, and a designated burn unit. The NICU totals 270 beds throughout the network, making it America’s largest neonatal center. As a US Department of Health and Human Services designated Ebola Assessment Hospital, Nationwide Children’s Hospital houses a 5-bed special pathogens isolation unit. The Abigail Wexner Research Institute at Nationwide Children’s Hospital is one of the Top 10 National Institutes of Health-funded freestanding pediatric research facilities. More information is available at NationwideChildrens.org.

Columbus is the state capital and largest city in Ohio. As the 14th largest city in the US, it is one of the fastest growing major metropolitan areas with a population of > 2 million residents. The overall cost of living in Columbus is 10% more affordable than the U.S. average, and as an up-and-coming tech city, the area's research and technology institutions are attracting the brightest minds from around the world.

Interested candidates should forward their cover letter along with a curriculum vitae to ID Division Chief, Jason Newland MD, MEd at: Jason.Newland@Nationwidechildrens.org.
